About Me

I am a student of Technology in Computer Systems Development, passionate about technology and constant learning.
I characterize myself as a proactive person, responsible and with good communication.

EDUCATION

Technology in Developing Software Systems
Institución Universitaria de Envigado
2020(2) - Present
4 Semesters

MisiónTic (Programming with emphasis in Web Dev)
Universidad de Caldas (Online)
800 hours
3/05/2021 - 18/12/2021

Java- Full Stack Developer (Springboot-Angular)
Mitocode Network (Online)
34 hours
15/01/2022 - 12/03/2022

SKILLS

SpringBoot   Java   Angular

HTML5   CSS3   JavaScript

My strength as a junior developer is the backend based on Java using the Springboot framework. In this area I have the ability to develop REST services interacting and accessing to Relational databases.

Nevertheless I also have basic knowledge in other technologies such as HTML, CSS, Javascript and Angular(TypeScript)

PERSONAL PROJECTS

I don´t have professional experience but I have developed personal projects

Mediapp

This is a system built by me where the users can manage medical appointments including doctors, patients, exams., and basic graphic statistics information based in the appointments. You can check the source code at my github repository.

Technologies:
-Frontend: Angular 13, CSS, HTML, JavaSript, Chart.js
-BackEnd: Java(SpringBoot), Spring Security, JWT, JPA, MySQL database.
